## DETAILED ACTION

### *Response to Amendment*

1. Applicant's amendment filed on February 07, 2005 has been entered. No claims have been amended. No claims have been cancelled. No claims have been added. Claims 1-7 are still pending in this application, with claims 1 and 3 being independent.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Ravago et al (US 6,529,584).

3. In regards to claims 1 and 3, Ravago discloses a method and audio data communications system (See Fig. 1 and Abstract) for enabling the user of a portable communications device (See Fig. 1 and telephony replay device 26)) to receive broadcast audio messages wherein at least one beacon device (See Fig. 3, media server 44, and application replay module 50) broadcasts a series of messages each in the form of a plurality of predetermined data fields arranged according to a first

Art Unit: 2642

communications protocol, wherein the beacon adds to each such message prior to transmission an additional data field carrying broadcast audio message data, and wherein the portable device receives the transmitted messages, extracts the audio broadcast data from said additional data field, and reproduces the audio to the user (See col. 1-2 lines 66-24 and col. 5-6 lines 55-38).

4. In regards to claims 2, 5, and 7, Ravago discloses a method and system, wherein said first communications protocol comprises Bluetooth messaging and the broadcast series of messages are inquiry message for the establishment of two-way communications (See col. 9 lines 9-16).
5. In regards to claims 4 and 6, Ravago discloses a system, wherein the beacon is arranged to include an indication in one of said predetermined data fields, said indication denoting the presence of audio data in said additional data field (See Abstract and col. 5 lines 55-62).

#### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brown et al (US 6,366,622) teach an apparatus and method for

Art Unit: 2642

wireless communications. Haartsen (US 6,574,266) teach a base-station-assisted terminal-to-terminal connection setup.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P. Knowlin whose telephone number is (571) 272-7486. The examiner can normally be reached on Mon-Fri 8:30-5:00pm.

9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar can be reached on (571) 272-7488. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
